Intro

Welcome to Wide Area Workflow e-Business Suite. This demonstration contains audio narrative. Please adjust your volume accordingly.

Step 1

This presentation will demonstrate how an IUID Contractor updates an UID.

Step 2

to rect Click to go to Enter UI page ppened to an existing item	
Connect IUID to modify or remove existing data that was entered in error Update Non-UII GFP to update Non-UII GFP information that exists in the registry	Jse the Update function to record an event that happened to an item. This event could be a reported mark that has been deleted from the tem or a new mark that has been placed on the item; a change in
Countes Counters In the registry Counters In t	3FP contract or possession; rollovers; recording an embedded elationship- attachment to or removal from another item (e.g. an engine is removed from or added to a plane); item ownership; special ooling or test equipment information; type designation; condition; or life cycle event such as destruction, donation, retirement, etc.

Use the Update function to record an event that happened to an item. This event could be a reported mark that has been deleted from the item or a new mark that has been placed on the item; a change in GFP contract or possession; rollovers; recording an embedded relationship- attachment to or removal from another item (e.g. an engine is removed from or added to a plane); item ownership; special tooling or test equipment information; type designation; condition; or a life cycle event such as destruction, donation, retirement, etc.

When an item moves from government hands to a contractor or vice versa, a custody record is required to indicate the change. This record gives the custodian the access to see the item and perform other update events on that item-for example, part number rollovers or adding marks. When Add Custody is selected, the Update IUID - Custody page is displayed. Click the Add link.
